NITER

Naznin Akter

Fashion Design and Apparel Engineering

Bio

A creative, hardworking & highly visual fashion individual who can brilliantly mix & match the technical expertise while developing design for different product lines related to fashion. As an educator, I have worked with multiple fashion institutions which allowed me to create a unique multidimensional approach to teaching and curriculum development. I have always been interested in the emergence of digital and 3D fashion as an essential component of a fashion graduate portfolio and focused individual's academic efforts on the integration of innovative and AI-powered tools into the curriculum. As a researcher, I am interested in the application of digital technologies to fashion, virtual clothing fit to enhance the garment manufacturing process as well as sustainable fashion concept.

Education
